## TEX FOR THE 90'S

Are you still  
struggling with  
PXL's, PK's or GF's?  
Move on to scalable  
fonts:

- Save megabytes of storage—entire VT<sub>E</sub>X fits on one floppy.
- Instantly generate any font in any size and in any variation from 5 to 100 points.
- Standard font effects include compression, slant, smallcaps, outline, shading and shadow. New: landscape. New: scalable graphics.
- Discover the universe of MicroPress Font Library professional typefaces: not available from any other T<sub>E</sub>X vender.

List price \$399    **Introductory offer \$299**

Includes the VT<sub>E</sub>X typesetter (superset of T<sub>E</sub>X), 10 scalable typefaces, VVIEW (arbitrary magnification on EGA, CGA, VGA, Hercules, AT&T), VLASER (HP LaserJet), VPOST (PostScript), VDOT (Epson, Panasonic, NEC, Toshiba, Proprinter, Star, DeskJet) and manuals.

Introductory offer expires on **June 1, 1991**.    S/H add \$5. COD add \$5. WordPerfect Interface add \$100. Site licenses available. Dealers' inquiries welcome. Professional typefaces available for older implementations of T<sub>E</sub>X.

# TurboTeX

Typesetting Software  
Including METAFONT

- Executables \$150
- With source \$300

TeX 3.0  
Update!  
Now Includes  
EGA/VGA  
Previewer!

TurboTeX Release 3.0 software brings you the latest TeX 3.0 and METAFONT 2.0 standards: preloaded plain TeX, L<sup>A</sup>TeX, A<sup>A</sup>S-TeX and A<sup>A</sup>S-L<sup>A</sup>TeX, and plain METAFONT interfaced to CGA/EGA/VGA/Hercules graphics; TRIP and TRAP certification; Computer Modern and L<sup>A</sup>TeX fonts, and printer drivers for HP LaserJet Plus/II/IIP, HP DeskJet, PostScript, and Epson LQ and FX dot-matrix printers. This wealth of software runs on your IBM PC (MS-DOS or OS/2), UNIX, or VAX/VMS system.

■ **Best-selling Value:** TurboTeX sets the standard for power and value among TeX implementations: one price buys a complete, commercially-hardened typesetting system. *Computer* magazine recommended it as "the version of TeX to have," *IEEE Software* called it "industrial strength," and thousands of satisfied users worldwide agree.

TurboTeX gets you started quickly, installing itself automatically under MS-DOS, and compiling itself automatically under UNIX. The 90-page User's Guide includes generous examples and a full index, and leads you step-by-step through installing and using TeX and METAFONT.

■ **Power Features:** TurboTeX breaks the 640K memory barrier under MS-DOS on any IBM-compatible PC with our virtual memory sub-system. Even without expanded memory hardware, you'll

have the same sized TeX that runs on multi-megabyte mainframes, with plenty of memory for large documents, complicated formats, and demanding macro packages (like PICTeX and A<sup>A</sup>S-L<sup>A</sup>TeX 2.0) that break other TeX implementations. On larger computers, TurboTeX runs up to 3 times faster in less memory than the Stanford Pascal distribution.

■ **Source code:** Order the TurboTeX source in portable C, and you will receive more disks with over 85,000 lines of generously commented TeX, TurboTeX, METAFONT, and printer driver source code, including: our WEB system in C; PASCAL, our proprietary Pascal-to-C translator; and preloading, virtual memory, and graphics code. TurboTeX meets C portability standards like ANSI and K&R, and is robustly portable to a growing family of operating systems.

■ **Availability & Requirements:** TurboTeX executables for IBM PC's include the User's Guide and require 640K and hard disk. Order source code (includes Programmer's Guide) for other machines. Source compiles with Microsoft C 5.0 or later on the PC; other systems need 1 MB memory and a C compiler supporting UNIX standard I/O. Media is 360K 5-1/4" PC floppy disks; other formats at extra cost.

■ **Upgrades:** If you have TurboTeX Release 2.0, you can upgrade the executables for only \$40. If you have the source distribution, upgrade

both executables and source for \$80. Or, get either applicable upgrade free when you buy the AP-TeX fonts (see facing page) for \$200!

■ **No-risk trial offer:** Examine the documentation and run the PC TurboTeX for 10 days. If you are not satisfied, return it for a 100% refund or credit. (Offer applies to PC executables only.)

■ **Free Buyer's Guide:** Ask for the free, 70-page Buyer's Guide for more details on TurboTeX and dozens of TeX-related products: previewers, TeX-to-FAX and TeX-to-Ventura/Pagemaker translators, optional fonts, graphics editors, public domain TeX accessory software, books and reports.

#### Ordering TurboTeX

Ordering TurboTeX is easy and delivery is fast, by phone, FAX, or mail. Terms: Check with order (free media and ground shipping in US), VISA, Mastercard (free media, shipping extra); Net 30 to well-rated firms and public agencies (shipping and media extra). Discounts available for quantities or resale. International orders gladly expedited via Air or Express Mail.

# AP-TEX Fonts

TEX-compatible Bit-Mapped Fonts  
Identical to  
Adobe PostScript Typefaces

If you are hungry for new TEX fonts, here is a feast guaranteed to satisfy the biggest appetite! The AP-TEX fonts serve you a banquet of gourmet delights: 438 fonts covering 18 sizes of 35 styles, at a total price of \$200. The AP-TEX fonts consist of PK and TFM files which are exact TEX-compatible equivalents (including "hinted" pixels) to the popular PostScript name-brand fonts shown at the right. Since they are directly compatible with any standard TEX implementation (including kerning and ligatures), you don't have to be a TEX expert to install or use them.

When ordering, specify resolution of 300 dpi (for laser printers), 180 dpi (for 24-pin dot matrix printers), or 118 dpi (for previewers). Each set is on ten 360 KB 5-1/4" PC floppy disks. The \$200 price applies to the first set you order; order additional sets at other resolutions for \$60 each. A 30-page user's guide fully explains how to install and use the fonts. Sizes included are 5, 6, 7, 8, 9, 10, 11, 12, 14.4, 17.3, 20.7, and 24.9 points; headline styles (equivalent to Times Roman, Helvetica, and Palatino, all in bold) also include sizes 29.9, 35.8, 43.0, 51.6, 61.9, and 74.3 points.

## A Gentle Introduction to TEX

A Manual for Self-study by Michael Doob

©Lions, *The TEXbook*, 1986; used by permission of Addison-Wesley Publishing Co.

A Gentle Introduction to TEX is perfect for the beginning TEX user.

Easy-to-follow and straightforward, this 89 page, softbound manual reveals the basics behind

TEX typesetting:

- characters and words
- paragraphs and pages
- mathematics
- simple tables
- simple macros

...with dozens of helpful examples and solutions in 11 friendly chapters.

# For T<sub>E</sub>X Users . . . .

## New Services and Prices from Computer Composition Corporation

We are pleased to announce the installation of several *new output services* now available to T<sub>E</sub>X users:

1. High Resolution Laser Imaging (1200 dpi) from *Postscript diskette files* created on either Mac- or PC-based systems.
2. High Resolution Laser Imaging (960 dpi) from *DVI magnetic tape or diskette files* using a variety of typefaces in addition to the Computer Modern typeface family.
3. High quality laser page proofs at 480 dpi.
4. **NEW PRICING** for high resolution laser imaging:
  - a. From **Postscript text files** in volumes over 400 pages . . . . **\$2.00 per page**
  - b. From **Postscript text files** in volumes between 100 & 400 pages . . . . . **\$2.25 per page**
  - c. From **Postscript text files** in volumes below 100 pages . . **\$2.40 per page**
  - d. From **DVI files** in volumes over 400 pages . . . . . **\$2.15 per page**
  - e. From **DVI files** in volumes between 100 & 400 pages . . . . . **\$2.30 per page**
  - f. From **DVI files** in volumes below 100 pages . . . . . **\$2.45 per page**

NOTE: DEDUCT \$1.00 FROM THE ABOVE PRICES FOR HIGH QUALITY LASER PAGE PROOFS.

5. **All jobs shipped within 48 hours.**

Call or write for page samples or send us your file and we will image it on the output unit of your choice.

# Three truths about T<sub>E</sub>X

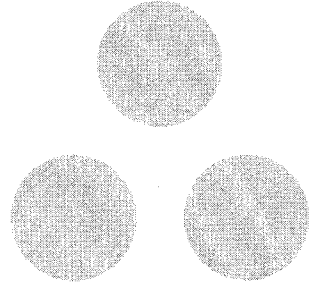

Beautiful mathematical typography.  
Difficult to use. Unsupported.

True. False. False.

Northlake Software provides T<sub>E</sub>X and L<sup>A</sup>T<sub>E</sub>X products for VMS systems. We've organized the pieces so you can find them and use them. The device interfaces in our T2 family are compatible, functional. They're documented. We provide support.

These are tools you can pick up and use once a month. Or every day. And they're so cleanly designed, you'll enjoy using them.

The truth and beauty —  
they're up to you.

# The Joy of T<sub>E</sub>X

---

---

## A Gourmet Guide to Typesetting with the $\mathcal{A}\mathcal{M}\mathcal{S}$ -T<sub>E</sub>X Macro Package, Second Edition

**M. D. Spivak**

This is the second edition of *The Joy of T<sub>E</sub>X*, the user-friendly guide to  $\mathcal{A}\mathcal{M}\mathcal{S}$ -T<sub>E</sub>X, which is a software package based on the revolutionary computer typesetting language T<sub>E</sub>X.  $\mathcal{A}\mathcal{M}\mathcal{S}$ -T<sub>E</sub>X was designed to simplify the typesetting of mathematical quantities, equations, and displays, and to format the output according to any of various preset style specifications. This second edition of *Joy* has been updated to reflect the changes introduced in Version 2.0 of the  $\mathcal{A}\mathcal{M}\mathcal{S}$ -T<sub>E</sub>X macro package.

The first two parts of the manual, "Starters" and "Main Courses," teach the reader how to typeset the kind of text and mathematics one ordinarily encounters. "Sauces and Pickles," the third section, treats more exotic problems and includes a 60-page dictionary on special techniques. The manual also includes descriptions of conventions of mathematical typography to help the novice technical typist. Appendices list handy summaries of frequently used and more esoteric symbols.

This manual will prove useful for technical typists as well as scientists who prepare their own manuscripts. For the novice, exercises sprinkled generously throughout each chapter encourage the reader to sit down at a terminal and learn through experience.

1980 Mathematics Subject Classifications: 00, 68

 DVIPSONE™

The converter that produces resolution-independent Post Script output using outline fonts

- Tired of reconverting DVI files to PS form every time you switch to a higher resolution device?
- Unhappy about the disk space chewed up by those high-resolution bitmapped fonts?
- Sick of running out of virtual memory on the printer when you use more than a handful of fonts?

DVIPSONE™ runs on IBM PC compatibles and can use any Adobe Type 1 outline font, including printer resident fonts, Computer Modern outline fonts and any of over 700 fonts in the Adobe font library.

*For more information contact:* Y&Y, 106 Indian Hill, Carlisle MA 01741

## Publishing Services

### From the Basic

The American Mathematical Society can offer you a basic TeX publishing service. You provide the DVI file and we will produce typeset pages using an Autologic APS Micro-5 phototypesetter. The low cost is basic too: only \$5 per page for the first 100 pages; \$2.50 per page for additional pages, with a \$30 minimum. Quick turnaround is important to you and us ... a manuscript up to 500 pages can be back in your hands in just one week or less.

### To the Complex

As a full service TeX publisher, you can look to the American Mathematical Society as a single source for all your publishing needs.

Macro-Writing	TeX Problem Solving	Autologic Fonts	Keyboarding
Art and Pasteup	Camera Work	Printing	Binding

For more information or to schedule a job, please contact Regina Girouard, American Mathematical Society, P.O. Box 6248, Providence, RI 02940 or call 401-455-4060 or 800-321-4AMS in the continental U.S.

For *fast* answers to common *TEX* questions, you need ...

# TEX for the Impatient

a practical handbook for  
new and current *TEX* users

by Paul W. Abrahams  
with Karl Berry and Kathryn A. Hargreaves

Clear, concise, and accessible, this handy reference manual is organized for easy retrieval of information. Thoroughly indexed and carefully designed, *TEX for the Impatient* is packed with explicit instructions, useful tips, and a wealth of witty and illuminating illustrations.

384 pages include:

- Complete descriptions of *TEX* commands, arranged for lookup either by function or alphabetically

Clear definitions of essential *TEX* concepts, collected in a separate chapter so that the command descriptions remain brief and accessible

- Explanations of common error messages and advice on solving problems that frequently arise
- A collection of useful macros

*TEX for the Impatient* is for busy people who have discovered the unmatched benefits of *TEX*, but who lack the time to master its intricacies. It is for everyone—new user to expert—who needs a quick reference guide to *TEX*.
