# Example project

Eric Mc Sween  
July 2020

## 1 Introduction

There is a theory which states that if ever anyone discovers exactly what the Universe is for and why it is here, it will instantly disappear and be replaced by something even more bizarre and inexplicable. There is another theory which states that this has already happened.

Figure 1: The Universe

## 2 Conclusion

“I always thought something was fundamentally wrong with the universe” [1]

Abstract

Oxford University Press  
Other (as stated in the work)  
This is a template and guide for preparing papers for *Monthly Notices of the Royal Astronomical Society* using the 'mnras' LaTeX package.

See the `mnras_template.tex` file (included and used by default when opening the template) for a simple template to help you get started.

The `mnras_guide.tex` file (also included) provides instructions for using the additional features in the document class. This is not a general guide on how to use

MNRAS 000, 1–2 (2015)

Preprint 7 July 2020

Compiled using MNRAS L<sup>A</sup>T<sub>E</sub>X style file v3.0

## MNRAS L<sup>A</sup>T<sub>E</sub>X 2<sub>ε</sub> template – title goes here

<sup>3</sup>Another Department, Different Institution, Street Address, City Postal Code, Country

Accepted XXX. Received YYY; in original form ZZZ.

### ABSTRACT

This is a simple template for authors to write new MNRAS papers. The abstract should briefly describe the aims, methods, and main results of the paper. It should be a single paragraph not more than 250 words (200 words for Letters). No references should appear in the abstract.

**Key words:** keyword1 – keyword2 – keyword3

### 1 INTRODUCTION

This is a simple template for authors to write new MNRAS papers. See `mnras_sample.tex` for a more complex example, and `mnras_guide.tex` for a full user guide.

All papers should start with an Introduction section, which sets the work in context, cites relevant earlier studies in the field by Fourier (1901), and describes the problems the authors aim to solve (e.g. Van Dijk 1902). Multiple citations can be joined in a simple way like De Lagnade (1903), De la Guardia (1904).

### 2 METHODS, OBSERVATIONS, SIMULATIONS ETC.

Normally the next section describes the techniques the authors used. It is frequently split into subsections, such as Section 2.1 below.

#### 2.1 Maths

Simple mathematics can be inserted into the flow of the text e.g.  $2 \times 3 = 6$  or  $v = 220 \text{ km s}^{-1}$ , but more complicated expressions should be entered as a numbered equation:

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a} \quad (1)$$

Refer back to them as e.g. equation (1).

#### 2.2 Figures and tables

Figure 1. This is an example figure. Captions appear below each figure. Give enough detail for the reader to understand what they're looking at, but leave detailed discussion to the main body of the text.

Table 1. This is an example table. Captions appear above each table. Remember to define the quantities, symbols and units used.

### TeX Live 2019 Upgrade—January 2020

Posted on January 23, 2020

### What's New in TeX Live 2019?

The official release notes for TeX Live 2019 are [available from TUG](#). The LuaTeX engine now uses Lua 5.3 (read more on [key changes in Lua 5.3](#)), and for advanced users, you can now use the HarfBuzz text shaping engine with [LuaLaTeX via the lualatex-dev binary](#). For those interested in TeX's internals, many TeX engines in TeX Live 2019 now [incorporate the `\expanded primitive`](#). You can also read more about TeX Live, and [Overleaf's TeX Live upgrade process](#).

### Key Changes in TeX Live 2019

#### KOMA-Script classes and titlesec incompatibility

The KOMA-Script classes, i.e., `scrbook`, `scrartcl`, `scrreprt`, will now throw errors if the `titlesec` package is loaded. Instead, use the commands provided by the KOMA-Script classes (`\setkomafont`, `\addtokomafont`, `\usekomafont`) to customise sectional headings: see the "Text Markup" section in the [KOMA-Script package documentation](#) for further details.

#### chemfig package updates

The `chemfig` package has overhauled its styling options interface quite a bit! For example, where you had written `\setatomon{15pt}`, previously you would

## 4. Maintenance
